Application Schematics

Host Board Application Schematic

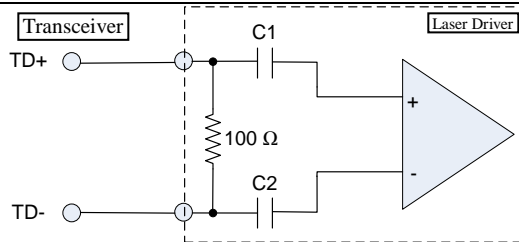

Notes:

- L1 & L2 = 600Ω @ 100MHz or better
- Route the differential pairs together using 50Ω impedance matched traces.
- Use separate power supply filtering for V_{CCT} & V_{CCR} as shown.
- Use low ESR capacitors for AC coupling of the TD+/- and RD+/- data signals
- Screw/Solder Posts are isolated from Signal Ground and may be connected to Chassis Ground or Signal Ground if Chassis Ground is not available

Ruggedization Notes

- Parylene C coating can be used for conformal coating with a 1.0 mil ± 0.2 mil thickness through a deposition process. It has a 5600 VPM rating, withstands temperatures of 350°F, and is extremely resistant to oil/dirt, and object impact.
- This part can come in a pigtail fiber optic version.
- Contact COTSWORKS for all MSDS, case composition, and burn analysis.
