

Features:

- Extremely small package maximizes portability and enhanced access to fiber or copper connections
- All metal case is rugged and secure but also lightweight, portable, easy to handle
- Comprehensive network switch support with 802.3az Energy Efficient Ethernet
- 100BASE-X and 1000BASE-X Fiber Interfaces
- Multimode or Single Mode optics
- 10/100/1000Base-T copper port speeds
- Robust networking support with the latest generation Marvell™ switch technologies.
- 1Mb packet buffer memory with true non-blocking switch performance
- Frame based flow control supports zero packet loss under temporary congestion
- 10Kb jumbo frame support
- Industry standard micro-USB plug for desktop communication, power, and firmware updates.

COTSWORKS Lightning Stick™ is an ideal laboratory and field-use device for engineers looking to test and qualify fiber optic links

Overview

The compact form factor Lightning Stick takes media conversion and link diagnostics to a new level.

Lightning Stick can replace inefficient, rack-based metal chassis plug-in modules. It is small enough to run in-line with copper and fiber cable. Powered by either a board connector or micro-USB connector, the conversion between light and copper is simplified and network managers can reclaim valuable rack and desktop space in media conversion applications as well as hold the most powerful ultra-portable link diagnostics tool.

Port Management

Lightning Stick has local management over USB to access both copper and fiber port control; provides straight-forward access to link and transceiver information. Control and Diagnostics in both directions: fiber and copper. Warnings and alarms for both can be set and managed in one interface.

Copper Auto-MDiX and Auto-Negotiation

Automatically detects the required cable connection type and configures the connection appropriately. Configurable auto negotiation or forced data speed, duplex and type.

Portable

Lightning stick can also be used as a network analyzing tool. Connections on both sides of the media converter can be tested with in-module Virtual Cable Test (VCT) tools on the copper interface and digital diagnostics on the fiber within Lightning Stick Software (LSS) accessible on the USB port.

General Specifications

Parameter	Symbol	Min.	Typ.	Max.	Unit	Notes
Optical Data Rate	BR _{Fiber}	125		1250	Mbps	(1)(2)
Electrical Data Rate	BR _{Copper}	10		1000	Mbps	(3)

Notes:

- 1) Default Data Rate is 1.25Gbps for LS-SX, LS-LX, LS-SFF-SX, LS-SFB-G-xx, and LS-SFP
- 2) Default Data Rate is 125Mbps for LS-SFB-M-xx
- 3) RJ-45 Electrical Interface Supports Auto-Negotiation of 10/100/1000 Mbps

Absolute Maximum Ratings

Parameter	Symbol	Min.	Typ.	Max.	Unit	Notes
Maximum Supply Voltage	V _{CC}	-0.3		4.0	V	
Storage Temperature	T _{sto}	-40		85	°C	
Operating Temperature	T _{OP}	-20		70	°C	
Relative Humidity	RH	0		85	%	

Electrical and Communication Specifications

Input Supply Voltage	4.5 – 5.5 VDC via micro-USB
Power Consumption	<1.6 W
Power Connector	Micro-USB B connector

Optical Characteristics (T_{OP} = -20 to 70°C, V_{CC} = 3.135 to 3.465 Volts)

Part Number	Optical Data Rate	Ethernet Standard	Wavelength (nm)	P _{out} Min (dBm)	P _{out} Max (dBm)	Rx Sens. Min (dBm)	Link Budget (dB)	Digital Diagnostics
RJ-Based Optical Interface Options								
LS-SX-BC	1.25Gbps	1000BASE-SX	850	-5	-1	-21	16	YES
LS-LX-BC	1.25Gbps	1000BASE-LX	1310	-5	1	-18	13	YES
