Change Description:

The RJ, SFF, and SFB families of transceivers will switch from the currently utilized black vinyl dustcaps to clear silicone dustcaps. There is no impact to the functionality of the transceivers and this change will improve the consistency of fit and ease of removal of the dustcaps. Shipping processes and current packaging are unaffected by this change.

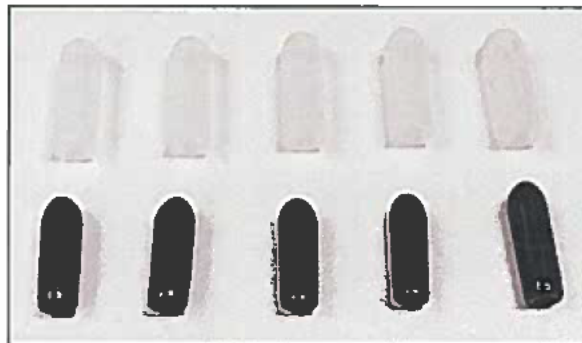

Figure 1 – Dustcap Comparison

The silicone dustcaps are long enough to be accessible when installed into LC receptacles as well as being softer and easier to remove.
