211-00017	211-00020

*Variable (x) in above part numbers denotes color indicator. There is no change to color variant received by customer previously.

Change Description:			
<p>COTSWORKS previously supplied 1.8mm LC Connectors with a Senko strain relief boot, Senko part number 931-JCBS-(x). That strain relief boot has been obsoleted by the vendor. Senko has released a replacement strain relief boot in the form of 931-MINI2-(x)-N*. COTSWORKS has validated that the replacement boot does act as a viable replacement for the COTSWORKS rugged LC connector lines.</p> <p>*Variable (x) in above part numbers denotes color indicator. There is no change to color variant received by customer previously.</p>			
Impact on Form, Fit, or Function	Form -The replacement boot is visually distinct from the original part number.		
	Fit – The replacement boot is 1.6mm longer than the original. The design is also a more flexible than the original boot. This is due in part to the material switching from a TPE to a TPR material.		
Qualification Data	Function – The desired operation of the individual strain relief boots remains the same, the replacement boot is designed to be more flexible, translating to a better performing strain relief for a 1.8mm connector assembly.
